

"Stronger than the film itself"

HANIMEX SPlice TAPES

DuPont MYLAR base gives Hanimex splice tape superior mechanical and optical qualities. Once applied, the adhesive permanently joins the tape and film.

The Hanimex system uses a separate tape for each film side — the easiest and fastest way to splice.

Use Hanimex Splice Tapes with any dry splicer.

Mylar is a Reg. T.M. of E. I. DuPont de Nemours Co. always choose Hanimex for all your photographic needs.
